Locker Rooms	Wildfire Odors
	Yachts

WHAT SATISFIED CUSTOMERS HAVE TO SAY:

"I manage an apartment complex and sometimes I had to replace the carpet to prepare a unit to rent again just to get rid of the odors. After working with a *Green Aire™* specialist, I replace carpets only when they are worn. This has saved me a lot of money over the years."

"We manage many large properties in the North East Ohio area. Whenever we have a stinky unit we call *Green Aire Solutions*. No matter what the odor is they always come through. Using their services has saved us a ton of money... before we used to have to paint and replace carpeting much more frequently. We also call them when we find lots of roaches, their odor removal service send the roaches away!"

— **Charles, New Millenium Holdings**

"We work for many large Lenders. Whenever we come across a mold house or a foul stench or even a smokers house, *Green Aire Solutions* comes through with flying colors. Their amazingly powerful equipment can do what others have promised in the past but failed to deliver. Whenever we have a pet owners house we don't even hesitate we use their services every time, their service works like magic and leaves any smelly property fresh as the mountain air."

— **Rick R, Howard Hanna**

AMAZING SERVICE
NEUTRALIZES MUSTY,
INTERIOR ODORS
KILLS MOLDS, BACTERIA,
AND ELIMINATES
ALLERGENS
QUICKLY, THOROUGHLY AND SAFELY
FROM INDOOR SPACES

Thinking of Selling Your Home?

In real estate, they have a saying:

**APARTMENTS THAT SMELL
ARE HARD TO RENT.**

IT'S ACTIVATED OXYGEN!

Activated oxygen is a form of oxygen consisting of three oxygen atoms (O₃) vs. normal oxygen (O₂).

Most odors are from the presence of organic chemical substances suspended in the air. That come from bacteria and molds. They also come from smoke and cooking residues.

Activated oxygen is extremely reactive. Activated oxygen reacts with chemicals in the air, leaving only normal oxygen, water vapor, and carbon dioxide.

Activated oxygen actually destroys the odor causing substances by oxidizing them. Activated oxygen also kills germs, the bacteria and molds that produce odor-causing substances.

Activated oxygen is produced in nature by lightning during thunderstorms. This explains the 'clean smell' of the air after a thunderstorm.

The Green Aire™ Solution

The Green Aire™ Solution creates O₃, or activated oxygen, in a special process that utilizes high voltage electrical current. Activated oxygen sanitizes by breaking down odors, microorganisms and other pollutants at their source.

We offer service where the technician sets up powerful oxygen cannons and air circulating equipment inside the space where odors or germs are a problem. O₃ is released inside the space for a period of three hours.

Activated Oxygen Penetrates Walls, Furniture and Carpeting

Our Oxi-Green technology units shoot HIGH LEVELS of activated oxygen gas into unoccupied areas to permanently eliminate, not merely mask or perfume, odors in your home, apartment, business or car.

It penetrates into the walls, furniture, carpet and padding killing the organisms and neutralizing the odors. We treat the HVAC, by introducing activated oxygen into the HVAC cold air return duct system, where it is then distributed throughout all the rooms of the space.

Only one treatment is needed to eliminate odors caused by pets, smoke, mold and mildew. It destroys bacteria and viruses including E Coli, Salmonella, Strep, Swine Flu, Rhino Virus, Staph, MRSA, and more!

It destroys common allergens, pollens, mold mildew fungi and dust mites! It can even destroy chemical odor causing compounds like carbon monoxide, ammonia, sulphur, gasoline kerosene and diesel smells and other VOC's. Our technology's rapid (same day) high intensity is performed while you are away and leaves behind no harmful residue.

Is Activated Oxygen is Safe?

Activated oxygen is pure oxygen and naturally breaks down to half the initial amount in just half an hour. Families can return to their homes in about three hours after the beginning of treatment.

Proprietary Oxi-Green Carpet Sanitizing Technology:

Our unique gas based carpet sanitizing machines can force the gas directly into the carpet and padding destroying carpet based germs and odors at the source, something a tiny little ozone machine can never accomplish!

DO YOU SUFFER FROM ALLERGIES?

ARE THERE PET ODORS?

URINE?

MUSTY AIR CONDITIONING?

DO YOU SELL OR RENT CARS?

DO YOU OWN OR MANAGE RENTAL PROPERTIES?

DO THE ODORS KEEP COMING BACK?

COLDS OR FLU'S PLAGUING YOU?

ARE THERE SMOKERS IN YOUR HOME OR BUSINESS?

ARE YOU THINKING ABOUT REPLACING THE CARPET?

If you've answered "Yes" to any of these, then you have a serious odor or germ problem calling for a serious solution that gets to the root of the problem.

Your Green Aire service technician will provide an estimate on what is needed to eliminate odors at their source. Not only from the air but also from furniture and mattresses.

See reverse for contact information.
